

## Managed SharePoint Services

Today business is about doing things faster, cheaper, and better than ever before. There's no better way to quickly connect your people and information than through Microsoft SharePoint and there's no easier way than through Marco's Managed SharePoint Services.

### WHY SHAREPOINT?

A SharePoint Intranet site allows you too:

- Centrally store, manage, and access documents across the enterprise.
- Extend shared business processes across the organization.
- Streamline every day business activities.
- Provide a simple, familiar, and consistent user experience.
- Help meet regulatory requirements through comprehensive content control.

With Marco's Managed SharePoint Services, you get to select the modules you need now and we take care of the rest. You can always add more later as your needs change. Marco provides the installation, configuration, site architecture, AND training and support – all for one monthly fee.

### 3 STEPS TO A SUCCESSFUL SHAREPOINT IMPLEMENTATION

#### Step 1

**Microsoft Licenses** – as a Microsoft Gold Partner, Marco understands the procurement process for Microsoft licensing and can help you get the best pricing.

#### Step 2

**Installation/Configuration** – Marco's knowledgeable and Microsoft-certified engineers will install and configure your SharePoint server based on your specific needs and environment.

#### Step 3

**Site Architecture/Implementation** – Marco's engineers will work with your staff to develop a user-friendly site architecture. Then we'll provide the ongoing site management and support needed for a successful implementation.

## Ala Carte Menu – Select the areas most important to you.

### Site Collection – 10 points

The top-level site (home page) that controls global settings of all subsites underneath it including permissions, storage quotes and themes.

### Site – 5 points (unmodified), 10 points (modified)

Pages that reside underneath a site collection. Sites/Subsites can have their own independent settings separate from their parent site or they can inherit settings from the site collection.

### My Site Setup – 20 points

A feature of Microsoft Office SharePoint Server (MOSS) which provides a personal workplace for individual end users in addition to a public view seen by colleagues used to display information and resources pertaining to the site owner.

### Calendars – 5 points

A SharePoint list that displays information in both a standard calendar and list formats.

### Lists – 5 points

A collection of items which can be displayed in many different ways on a site. Examples of lists include announcements, links, contacts, tasks, and issues.

### Libraries – 5 points

A collection of documents, pictures, pages, forms, discussions or wiki pages on a site.

### Custom Web Parts/Application Integration – 15 points

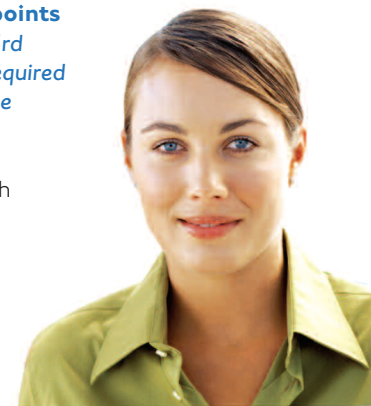

A number of developers and companies have developed solutions for SharePoint as either Web Parts or SharePoint Applications. Marco will install and deploy these for you in your SharePoint environment.

### Excel Services – 20 points

A feature of Microsoft Office SharePoint Server (MOSS) that makes it simple to use, share, secure, and manage Microsoft Office Excel 2007 workbooks (.xlsx, .xlsb) as interactive reports on a site.

### Business Data Catalog – 20 points (setup only, if integration to a 3rd party software application is required a separate scope of work will be created & quote provided)

A feature of Microsoft Office SharePoint Server (MOSS) which provides a way to integrate business data from back-end server applications within SharePoint.
